

 **IsoControl**

*volumetric in-line sampler for sanitary liquids*

**Mounting on pressurized or vacuum lines.**

**Ref:** M4KSA (1cc ou 3cc)

- The *IsoControl* ® takes volumetric samples of liquids in-line. Sampling volume per cycle : 0,5ml. The sampling bottle is screwed on the body. Bottles Sample volumes : 125ml, 250ml and 500ml.
- Simple functions. Easy maintenance.
- Thanks to the minimisation of the dead volumes, IsoControl insures the best representativity.
- Its design avoids any risk of leakage and makes it safe for the operator.
- All metallic parts are made of SS 316. O-rings are proposed in Buna with FDA certificate or all other material compatible with the product to be sampled.
- Optional PLC cabinet available.

**Ref:** MSA (0,5cc)

.....  
**Applications in alimentary and pharmaceutical industries.**
