

 **LiquiProof**® allows samples to be taken from all types of liquids in either drums, tanks or containers.

Thanks to its push/seal bottom valve closing mechanism this sampler allows you to obtain representative samples from different levels within the container

- *Point, cross-sectional and bottom sampling*
- *100% PTFE - chemically-neutral sample collection*
- *Transparency of the sampling tube*
- *Safe and easy to use with interchangeable components*
- *Available lengths : 1m*
- *Diameter of the tube : 25mm*
