

 **Control-it**

Sampling control seals

 **TECHNICAL DATA SHEET**

The **Control-it**® **Sampling Control Seals** are based on a highly adhesive backing in order to repair sacks or bigbags after sampling.

They are used to :

- Ensure a perfect sealing of containers (paper or plastic bags, BigBags, ...) after sampling, even if powder has been spilled on the surface;
- Avoid product spillage after the sampling and the risk of environmental contamination;
- Provide the inviolability of the packaging and avoid the risk of crossed contamination;
- Identify that sampling has been done: customized printed seal with specific text or colour marking;
- Meet applicable EC hygiene regulation 1935/2004 with foodgrade seals if materials come into contact with foodstuffs.

 **Standard :**

- Presentation : in rolls of 1000 pcs
- Formats : Round diam.95mm or square 80x80mm
- Construction : highly adhesive seals conforming applicable BfR European and FDA American standards for direct contact with food.
- Alimentary conformity declaration available upon enquiry.

 **Customized :** choose your custom labels according to your personal needs !

- with your logo, texts, colours, sizes,
- other constructions: re-printable, removable, double coating...
- & presentations: in continuous rolls, sheets, folding sheets...
